<https://tinyurl.com/y9bbxwz6>

Topics: Emerging Evidence in Perinatal Death  
Understanding Perinatal Evaluation and Autopsy  
Parent Panel  
Mindfulness in Bereavement  
Perinatal Bereavement  
Resources for Families

## Objectives:

At the conclusion of the workshop, participants will be able to:

- Examine recent research publications related to perinatal loss
- Formulate approaches to incorporating new research into care and providing education to families regarding evidence-based practices.
- Examine perinatal evaluation options and discuss pros/cons of evaluation
- Consider the role of cultural needs, financial restrictions, myths in perinatal loss evaluation
- Identify effective interventions as perceived by perinatal loss patients
- Demonstrate mindfulness as self-care and as a therapeutic modality for traumatized and grieving families
- Introduction to providing holistic care to families preparing for or enduring perinatal loss
- Share personal and professional experience with perinatal loss
- Review and discuss care protocols at current facility
- Identify resources available to health professionals and families including photography, financial assistance, emotional support, remembrance activities, medical evaluation, grief therapy, and more.
